

Compiled by Mark Licht, Department of Agronomy, Iowa State University, Ames, IA

Total acreage of cover crops planted in Iowa in fall of 2018 are preliminarily estimated at 880,000 acres. This estimate is based on the Iowa Learning Farms farmer survey. Final estimates will be available in March of 2019. Cost shared acres through Practical Farmers of Iowa include 1,381 acres (\$55,240) from NRCS CIG grant and 21,755 acres (\$217,550) from ADM/Unilever Sustainable Soy Continuous Improvement program. Additional cost share opportunities include the Iowa Department of Agriculture and Land Stewardship, USDA-NRCS EQIP contracts, USDA-NRCS CSP supported contracts and crop insurance premium reduction (acres and monetary contribution unknown at time of reporting). Outreach efforts on cover crops in Iowa reached over 13,700 individuals through approximately 150 events, including Iowa State University Extension, Iowa Learning Farms and Practical Farmers of Iowa outreach activities. Other cover crop outputs included publication of five refereed scientific articles and two M.S. thesis. For 2018, there were seven graduate students, three post-doctoral research associates, and one research associate conducting research on cover crops and five new projects were funded.
